## To Export messages in Windows Live Mail.

First, make a new folder on the Desktop, name it as the Export date i.e. 26 Sept 2013

Click the drop box in the blue square top left. Line Mindows Live Mail		
■ ► <u>N</u> ew	÷	Email messages
<u>S</u> ave	F	
Print		
Import mess	ages	
Export email	•	

Select as above.

Select Microsoft Windows Live Mail, click Next.

Click Browse and select your new folder, click Next. Leave as All folders, click Next then Click Finish.

The image above is my new folder 26 Sept 2013 > Gmail (1) > Inbox folder.

Every sub folder has an entry called **wimail.fol** which is for **Importing** into **WLM**. Any message can be opened and read by clicking it, without **Importing** into **WLM**. I never **Import** anything, I just delete any entry or folders I don't want.

Now move the **26 Sept 2013** folder to a folder called **Saved Mail** and put it anywhere you want. You can repeat it anytime by making a folder using the date as the name of your next **Export**.
